## EXPERIENCE

### BOISE CODEWORKS CODE SCHOOL

*Full Stack Development Program | Aug 2021 - Nov 2021*

- Utilized Scrum techniques to facilitate seamless collaboration with small team while developing full stack road-trip application built using Veu3, mongoose, and MapBox API.
- Developed and delivered social media application in timely fashion, developing effectively and efficiently utilizing NodeJs, MongoDB, and Vue,
- Worked with a small team to build out server side of Reddit-like application, utilizing time-boxing and unit testing techniques to deliver final product in under expected time limit.

### BOISE STATE UNIVERSITY

*School of Business - Marketing | Aug 2018 - May 2021*

- Collaborated with small team to analyze predictive data trends, creating/ launching BuzzFeed post to front page, gaining over 100k interaction within 48 hours.
- Analyzed economic data to produce functioning predictive model of potential market impacts of Covid-19 on local grocery industry.
- Drafted fully functional market entry plan for foreign market. Created full analysis, highlighting potential pitfalls and opportunities of attempting to penetrate an emerging economy (Peru).
